

NTB-55-CASE

Window system Open-in casements

The system is glazed internally to accommodate up to 35mm thick double glazed units, using standard beads. As with all Brital systems, the Open-in window system is manufactured to exacting standards enabling economy to be combined with strength to give many years of aesthetic, trouble-free operation.

NTB-55-CASE

System Performance

SIZE

- Corners formed as 45 degree mitres to provide a quality appearance, high performance and weather resistance

DESIGN

- Economy is combined with strength to provide many years of trouble free operation and to be aesthetically pleasing.
- Designed to perform at wind resistances up to 2.4 kPa.

PERFORMANCE

- Thermal performance can achieve U_w of 1.6 W/m²K.
- Opening panels fully weather-sealed with EPDM gaskets.

INSTALLATION

- Accommodates various thicknesses of single and double glazed units.
- Thermal Break frameless outward opening vent panels can be incorporated.
- Neat fully sealed weather seal joints.
